LANDSCAPE STONE

Product Information Guide

★ The Semco Promise ★

Semco Stone owns and operates our own quarries. We pride ourselves in providing a natural and quality product. Our diverse building stone collection has some of the most unique products you will find. The beauty of our products is they are made from natural stone, therefore variations should and can be expected. Even though colors in this brochure are as close to the actual stone as possible, photographic and printing techniques – and even actual viewing conditions – can alter perception of color.

Selections should be made from actual samples whenever possible, but even samples can vary from the delivered product simply because the beauty of natural stone is that each piece is unique. Semco Stone does the best we can to maintain consistent colors and textures. Communication is key with masons, contractors and your sales representative so that Semco can do our best to provide exactly what you need to complete your dream project.

As the largest distributor of natural stone products in the Midwest, at Semco Stone, we have earned our reputation through consistent products, advancements in technology, and quality and service that exceed industry standards, laying a solid groundwork for your success. We operate to ensure lasting satisfaction and something our customers can enjoy for years to come.

"People don't buy what you do; they buy why you do it. And what you do simply proves what you believe."

Semco Building Stone and Landscape Stone are natural stone products. Semco uses state-of-the-art technology to extract the stone in its natural state as safely as possible. However, products may contain cracks, pits, or other imperfections as a result of the quarrying process. The beauty of natural stone products resides in its unique characteristics; as a result, color, texture, size and bed-face variations will occur and may vary from samples provided to the customer and from shipment to shipment. Photographs, print material and items viewed on the Internet may be, in some measure, different from the stone you actually receive. All products are provided to you "AS IS" without warranty of any kind.

Effective March 15th 2023, our policy for “Orders Ready, Over 30 Days”

- **After an order becomes ready for pickup or delivery, the customer will have 30days to accept delivery of material or get it scheduled for delivery.**
 - This applies to orders that we are to ship, as well as orders that the customer intends to handle the freight on.
 - If we are scheduling it, and are being delayed in acquiring a carrier, the customer will not be held responsible. – As long as they are agreeing to a reasonable market rate that we provide.
- **Once an order has hit the 30day threshold and is still sitting, the following will apply:**
 - Customer pays a 50% deposit to hold the order.
 - Without a deposit, the order **will be cancelled** out of the system and the material will be available for the next in line.
 - If a customer still wants the material on order after cancellation, a new order would be needed and current ETA's applied.
- **Order status will be tracked in line with the ETA's posted on the orders.**
 - *For example* : If an order is given an ETA to be complete on May 1st, but is ready early on April 10th, the 30day tracking doesn't start until May 1st.
 - If ready past the ETA, timing starts when ready to be picked up/shipped.
- **For any order that a customer would cancel *after* we have received the 50% deposit, that 50% will be handled as follows:**
 - We will refund 25% (*1/2 of their deposit amount*)
 - The remaining deposit, 25% of the order, will be the restocking fee as per our standard practice.
